

# Student Skill Portfolio Website Project

## Development Report

---

Name: Vishal kumar thakur

Roll No: MCA2504131

Role: Homepage Developer

### Team Roles

| Member   | Role                                       | Branch           | Responsibilities                                                                 |
|----------|--------------------------------------------|------------------|----------------------------------------------------------------------------------|
| vishal   | Homepage Developer                         | home-page        | Homepage, navigation, introduction                                               |
| ayush    | Profile Section Developer                  | profile-section  | Profile cards, skills, GitHub links                                              |
| mithil   | Projects Section Developer                 | projects-section | Projects section and project cards                                               |
| avishkar | GitHub Manager & Contact Section Developer | contact-section  | Repository, collaborators, branches, PR review, merges, deployment, contact form |

### Project Objectives

The main objectives of this project were:

- Develop a responsive student portfolio website.
- Learn collaborative software development.
- Gain practical experience with Git and GitHub.
- Implement feature branching and version control.
- Practice Pull Requests and code reviews.
- Improve teamwork and communication.
- Deploy the final project using GitHub Pages.

### Project Overview

The website consists of four major sections:

- Homepage
- Student Profiles
- Projects
- Contact

Each section was developed independently by a team member using a separate Git branch. After development, the GitHub Manager reviewed and merged all contributions into the main branch.

## Technologies Used

### Frontend

- HTML5
- CSS3
- JavaScript

### Version Control

- Git
- GitHub

### Deployment

- GitHub Pages

## Git & GitHub Workflow

The project followed an industry-standard Git workflow.

### Step 1

Create Repository

### Step 2

Clone Repository

```
git clone https://github.com/Manas-Deshpande/4BytesProj.git
```

### Step 3

Create Feature Branch

Example

```
git checkout -b home-page git
checkout -b profile-section git
checkout -b projects-section git
checkout -b contact-section
```

### Step 4

Develop Feature

Each student completed their assigned module independently.

### Step 5

Commit Changes

```
git add . git commit -m "Completed
Homepage"
```

### Step 6

Push Branch

```
git push origin home-page
```

### Step 7

Create Pull Request

Each member created a Pull Request on GitHub.

### Step 8

Review Pull Request

The GitHub Manager reviewed all submitted Pull Requests.

### Step 9

Merge Pull Request

Approved Pull Requests were merged into the **main** branch.

## Step 10

### Deploy

The final website was deployed using GitHub Pages.

---

## Branching Strategy

main

|

└─ home-page

|

└─ profile-section

|

└─ projects-section

|

└─ contact-section

## Team Roles and Responsibilities

### Student 1 – Lokesh (Homepage Developer)

**Branch:** home-page

Responsibilities:

- Designed the homepage.
- Created the navigation bar.

- Added website title.
  - Added introduction section.
  - Submitted Pull Request.
- 

## Student 2 – Ambar (Profile Section Developer)

**Branch:** `profile-section`

Responsibilities:

- Created profile cards.
  - Added student names.
  - Added skills.
  - Added GitHub profile links.
  - Submitted Pull Request.
- 

## Student 3 – Pratiksha (Projects Section Developer)

**Branch:** `projects-section`

Responsibilities:

- Developed Projects section.
  - Added three project cards.
  - Added project descriptions.
  - Mentioned technologies used.
  - Submitted Pull Request.
- 

## Student 4 – Manas (GitHub Manager & Contact Section Developer)

**Branch:** `contact-section`

Responsibilities:

### GitHub Management

- Created GitHub repository.
- Added collaborators.
- Managed branches.
- Reviewed Pull Requests.
- Merged all approved Pull Requests.

- Maintained repository.

## Website Development

- Built Contact section.
- Added Email field.
- Added Message field.
- Added Submit button.

## Deployment

- Published website using GitHub Pages.
- Verified live deployment.

## Conclusion

The Student Skill Portfolio Website project successfully demonstrated collaborative software development using Git and GitHub. By dividing the project into separate modules and following a structured branching strategy, the team was able to work efficiently and integrate all features through Pull Requests. The project strengthened our understanding of version control, collaborative development, responsive web design, and deployment using GitHub Pages. Overall, it provided valuable practical experience that reflects real-world software development practices.

## GitHub Repository:

The screenshot shows the GitHub repository page for '4BytesProj' by Manas-Deshpande. The repository is public and has 5 branches and 0 tags. The file list includes README.md, index.html, script.js, and style.css. The commit history shows 14 commits, with the most recent commit by Pratikshakadam2004 moving the contact section to the bottom and fixing CSS. The README section displays the project name '4BytesProj'.

| File       | Commit Message                             | Time Ago    |
|------------|--------------------------------------------|-------------|
| README.md  | Initial commit                             | last month  |
| index.html | Move contact section to bottom and fix CSS | 3 weeks ago |
| script.js  | feat: initial project structure            | last month  |
| style.css  | Move contact section to bottom and fix CSS | 3 weeks ago |

## Branches:

The screenshot shows the 'Branches' tab of the '4BytesProj' repository. It lists the default 'main' branch and four other branches: 'contact-section', 'projects-section', 'profile-section', and 'home-page'. Each branch entry shows the last commit time, check status, and the number of commits ahead or behind the default branch.

| Branch           | Updated     | Check status | Behind  | Ahead | Pull request |
|------------------|-------------|--------------|---------|-------|--------------|
| main             | 3 weeks ago | ✓ 3 / 3      | Default |       |              |
| contact-section  | 3 weeks ago |              | 2       | 0     | #1           |
| projects-section | 3 weeks ago |              | 5       | 0     | #5           |
| profile-section  | last month  |              | 7       | 0     | #4           |
| home-page        | last month  |              | 11      | 0     | #2           |

## GitHub Pages Deployment:

The screenshot shows the GitHub web interface for the repository `Manas-Deshpande / 4BytesProj`. The left sidebar contains navigation links: `<> Code`, `Issues`, `Pull requests`, `Actions`, `Projects`, `Wiki`, `Security and quality`, `Insights`, and `Settings`. The `Deployments` section is active, showing `All deployments` and `Environments` with `github-pages` selected. The main content area is titled `github-pages deployments` and displays the latest deployment: `github-pages`, which was last deployed 3 weeks ago to `https://manas-deshpande.github.io/4BytesProj/`. Below this, a filter bar shows `1 deployments`. The deployment list includes a deployment titled `Move contact section to bottom and fix CSS` (Active), deployed to `github-pages` by `Manas-Deshpande` via `pages-build-deployment #1` on the `main` branch, 3 weeks ago. The Windows taskbar at the bottom shows the time as 06:46 PM on 31-07-2026, with a rain warning and system icons.
