

Student Skill Portfolio Website Project Development Report

Tanmay Mane

ROLL NO: MCA2504104

Role: Making Home-Page

Team Roles

Member	Role	Branch	Responsibilities
Tanmay	Homepage Developer	home-page	Homepage, navigation, introduction
Vaishnavi	Projects Section Developer	projects-section	Projects section and project cards
Aparna	Profile Section Developer	profile-section	Profile cards, skills, GitHub links
Shweta Ubale	GitHub Manager & Contact Section Developer	contact-section	Repository, collaborators, branches, PR review, merges, deployment, contact form

Project Objectives:

The main objectives of this project were:

- Develop a responsive student portfolio website.
- Learn collaborative software development.
- Gain practical experience with Git and GitHub.
- Implement feature branching and version control.
- Practice Pull Requests and code reviews.
- Improve teamwork and communication.
- Deploy the final project using GitHub Pages.

Project Overview:

The website consists of four major sections:

- Homepage
- Student Profiles
- Projects
- Contact

Technologies Used:

Frontend

- HTML5
- CSS3
- JavaScript

Version Control

- Git
- GitHub

Deployment

- GitHub Pages

Git & GitHub Workflow

The project followed an industry-standard Git workflow.

Step 1:

Create Repository

Step 2:

Clone Repository

[git clone https://github.com/Pravin-junne/student-portfolio.git](https://github.com/Pravin-junne/student-portfolio.git)

Step 3:

Create Feature Branch

Example

```
git checkout -b home-page  
git checkout -b profile-section  
git checkout -b projects-section  
git checkout -b contact-section
```

Step 4:

Develop Feature

Each student completed their assigned module independently.

Step 5:

Commit Changes

```
git add .  
git commit -m "Completed Homepage"
```

Step 6:

Push Branch

```
git push origin home-page
```

Step 7:

Create Pull Request

Each member created a Pull Request on GitHub.

Step 8:

Review Pull Request

The GitHub Manager reviewed all submitted Pull Requests.

Step 9:

Merge Pull Request

Approved Pull Requests were merged into the main branch.

Step 10:

Deploy

The final website was deployed using GitHub Pages.

Branching Strategy

main

Team Roles and Responsibilities:

Student 1 – Tanmay (Homepage Developer)

Branch: home-page

Responsibilities:

- Designed the homepage.
- Created the navigation bar.
- Added website title.
- Added introduction section.
- Submitted Pull Request.

Student 2 – Aparna(Profile Section Developer)

Branch: profile-section

Responsibilities:

- Created profile cards.
- Added student names.
- Added skills.
- Added GitHub profile links.
- Submitted Pull Request.

Student 3 – Vaishnavi(Projects Section Developer)

Branch: projects-section

Responsibilities:

- Developed Projects section.
- Added three project cards.

- Added project descriptions.
- Mentioned technologies used.
- Submitted Pull Request.

Student 4 – Shweta Ubale (GitHub Manager & Contact Section Developer)

Branch: contact-section

Responsibilities:

GitHub Management

- Created GitHub repository.
- Added collaborators.
- Managed branches.
- Reviewed Pull Requests.
- Merged all approved Pull Requests.
- Maintained repository.

Website Development

- Built Contact section.
- Added Email field.
- Added Message field.
- Added Submit button.

Deployment

- Published website using GitHub Pages.
- Verified live deployment.

Conclusion

The Student Skill Portfolio Website project successfully demonstrated collaborative software development using Git and GitHub. By dividing the project into separate modules and following a structured branching strategy, the team was able to work efficiently and integrate all features through Pull Requests. The project strengthened our understanding of version control, collaborative development, responsive web design, and deployment using GitHub Pages. Overall, it provided valuable practical experience that reflects real-world software development practices.
